### **Future Add On**

algPoS is currently working hard to add new features to the NPoS application they include

- E-Top Up via the EPoS terminal
- Customer Accounts

For more information on any features or to Arrange a Demo of ANY of the algPoS Software please contact on (01604) 289431 or (07977) 077432

### **The Benefits of EPoS**

**with a EPoS system you gain a wider understanding of your business as well as better control of your stock and staff**

**a EPoS System offers you some of the following**

- Pricing control from a central location
- Accurate pricing at the Point of sale (no more keying or staff entering what value they like)
- No more time needed for staff to price each item up (as the shelf location would have the price)
- Price change is quicker as all you need to do is change the price and print the new Shelf edge label the till will automatically update
- Stock is better tracked by the EPoS system thanks to the database that powers the system
- Details Receipts help customers to fully understand what they have brought
- Easy change your receipt information (so you can give custom message for Christmas and new year etc)
- Fully print your store logo or band on the receipt

Information within the flyer can be changed without notice as the application is still under active development and support. For further information and demo of the systems please contact algPoS.
